Catarrh Permanently Cured.

"I am a blacksmith and my trouble began by my working in a draft," said Mr. E. H. Price, a well-known resident of Lawrenceville, who lives on Forty-six-and-a-Half street, and is in the employ of the Sheffler Bridge Company, "I caught a severe cold and from that time my catarrhal symptoms manifested themselves, My head and nose would be so filled with my

Mr. E. H. Price.

caused me to be almost continually spitting. The disease finally reached my lungs, I felt a weight in my chest as if my lungs were stopped up. My breath became short and finally a violent cough set in, which increased until I coughed day and night. I had erucrations of gas from my stomach, and I had a tired feeling, but more so on getting up in the morning As I read in the papers statements from patients who had been cured by the catarrh specialists at 223 Penn arenue of conditions similar to mine I took a course of their treatment and became completely cured. It is now some time since I took their medicine and my cure has remained permanent. I shall be glad to further describe my case to any one who suffers as I have done.

THE PRESCRIBING

And treatment of all patients at the Catarrh and Dyspepsia Institute is, and always has been, under the direct charge of skilled specialists, who are regular graduates and registered at the Prothonotary's office, as anyone will find by inquiring. They are permanently located at 323 Penn avenue, near Fourth street, and will continue to treat their specialty, catarrh and dyspepsia, as heretofore.

While they charge a reasonable price for treatment, they refuse no one treatment or medicine because he is poor.

Office bours 10 A. M. to 4P. M., and 5 to 5P. M.

medicine because he is poor.

Office bours, 10 A. M. to 4P. M., and 6 to 5P. M.
Sundays, 12 to 4P. M.
Consultation free to all. Patients treated successfully at home by correspondence. Send two 2-cent stamps for question blank and address all letters to the Catarrh and Dyspepsia

Institute, 323 Penn avenue, Pittaburs.

DANGEROUS FACE POWDERS—HOW to banish Pimples, Elotches, Black Grabs, Etc.—Upon two things the healthy condition of the skin depends—oil and coloring matter. The skin of a very old man or woman, for want of oil, becomes like wrinkled, dried up parchment. The finest and most costiy face powders and cosmetics, which fashionable society ladies use to beautify their complexion, are all injurious, and cause skin diseases, while the ladies who occasionally apply Email's Magic Balm to their face always have the softest and clearest of complexions. Email's Balm is not a cosmetic, not a white wash, but a thorough healing skin ointment. It penetrates the pores and makes the skin pearly white and natoral, and you can't tell what did it. A positive cure for pimples, black heads, tetter, ring worm, salt rheum, piles, erysipelas and all skin diseases. 50 cents, at every drug store or by mail. Address Joseph Fleming & Son, Pittsburg, Pa.

burg, Pa.

PITTSBURG, March 17, 1888,
Email's Magic Balm is a good seller, and
gives better satisfaction than any other healing balm or ointment I have ever sold. A
young lady customer, whose face was covered
with pimples, recently bought a box, and it removed every pimple and wonderfully improved
her complexion.

The Neglected Bakerstown Field Comes to the Front With a Big Well.

ANOTHER GUSHER AT WILDWOOD.

The Roth Oil Company Again in Luck, Striking a Producer of the First Magnitude.

DRILLING TO BE DONE BY ELECTRICITY.

Operations.

PEFCIAL TELEGRAM TO THE DISPATCE, BAKERSTOWN, September 28 .- Bakers town is not dead, but has only been sleeping. Among the surprises of the southwest which have greeted the trade during the past month, the Butchers' well at Bakers-town, on the Ross Clendenning farm, is unquestionably the most conspicuous. The importance of the new wonder does not lie wholly in the magnitude of its production, but its significance is more fully comprehended in the possibilities of a large scope of territory it has apparently opened up. For a long time but little attention has been paid to the Bakerstown field, and by nearly all practical operators and the trade in general this old pool has been relegated to the

category of things irrevocably past and gone. For this reason the surprise is so much the greater, and will afford the philosophfeal producer much interest in contemplating the probable future of the field. For some time they have been fishing for a piece of steel lost in the boulder from which horizon the well has been spraying some oil. The ob-stacle, fortunately, was removed Thursday night, and on Friday morning drilling was re-sumed, and at seven feet in the drill tapped the first pay, when the well commenced flowing like an old Thorn creek gusher. On the startoff, by an actual gauge, the well did an inch a minute, or at the rate of 150 barrels an hour. minute, or at the rate of 180 barrels an hour. The owners were not prepared for a well of this caliber, and had only a limited amount of tankage on hand, and consequently lost a large portion of the production. Notwithstanding this fact the pipe line reports show that the well made the first 24 hours 2,500 barrels, and late Saturday night was holding up at 75 barrels an hour; the well is now connected to a 1,200 barreltank belonging to the Pipe line. The well is located on a direct line between the old Gould pool and the Wildwood field, being three miles southwest from the former and about four and a balf miles northeast from the latter. It is also 590 or 900 feet southeast from the Richards well which when struck started off at the rate of 80 barrels a day, and a half mile northwest from Joe Willison's well on the Patton farm which is doing eight or ten barrels a day. Willison & Co., on the Bell farm, are drilling at 1,000 feet and are on top the 100-foot with their Mahan No. I. The Chartiers Oil Company, on the Jack farm, are rigging up at No. 2, and the Fisher Oil Company, on the John Jack, have a rig nearly completed. Ireland and Hugbes, on the Martin Monks farm, are putting lumber on the ground for a rig, while Joe Willison & Co. are building two upon the William Jack farm. D. H. Teredrick is expediting matters on the Garrow, and will soon have a rig ready to bounce the drill. Joe Willison has sold his half interest in the Martin Monks farm to P. B. Crosby, of Butler; consideration private. The owners were not prepared for a well of

More Luck for the Roth Company. WH.DWOOD-The Roth Oil Company are again in luck. Saturday night about 7 o'clock

they tapped the first pay in Harbush No. 4. which began flowing at the rate of 50 barrels an hour. The well was shut down until tomorrow morning, when it will be drilled in; it
has the carmarks of a big well. The same
company to-day located No. 2, on the Scott lot,
at Semble station. Quite an inconvenience
was occasioned by a shortage of water supply
on the Reshever farm and the result was the
shutting down of a number of wells notif the necessary arrangements can be made for a sup-ply. Forst & Co.'s No. 5, on the Roishouse ply. Forst & Co.'s No. a, on the Rossnosse farm, is doing 100 harrels per day. They also located No. 2 on the Biddikeeper farm, and No. 3 on the ice pend lot. Forst & Co. and No. 3 on the ice pend lot. Forst & Co, and Barnsdale, Andrews & Co, have amicably arranged their differences as to the boiler on the Willison farm, of which mention was previously made in these columns. Mr. Andrews, for his company, agrees to keep a man at the boiler to see that the adjoining wells or tankage do not suffer from the nationing danger of fires. Forst & Co, got the tools out of their No. 6 on the Rolshouse farm and are drilling the well a little to-day with noted improvement. Barnsdale, Andrews & Co, have got rig No. 4 up on the Zingenheim farm. Their Willison No. 2 is drilling 13 feet in the sand, and at this veriting looks like a small well. Their No. 3 on the same farm will get the sand this evening. Burt & McBride got the tools out of their well on the "Doc" Moon farm, and drilling is again resumed.

NEW WELLS LOCATED. Griffiths and the Forest Oil Company located Nos. 4 and 5 on the Smith farm to-day, No. 4 being 400 feet west of the Smith Oil Company's No. 3, and No. 5800 feet northwest of the same weil. They are also down 400 feet with the Herr well No. 2. Their No. 3 Whitesell is still boing 650 barrels, trying to keep pace with No. 2 on the same farm. Dunn, Phillips & Co, are nown 490 feet on the Dr. Smith farm with their

No. 3 well, and No. 4 rig is up on the same farm and ready for the drill. Byrnes & Dwyer have gor the lumber on the ground for their Sump-son No. 4. No. 3 rig is completed and started son No. 4. No. 3 rig is completed and started to rig up.

The Smith Oil Company's No. 3, on the Smith farm, which was reported het night at 33 barrels per hour, had fallen off this morning to about 15 barrels per hour and drilling was again resomed. They expect to get a deeper pay to night or Monday. Their No. 2, on the same farm, is drilling 56 feet in the sand and will probably make a 100-barrel producer. They have also located No. 6 on this farm. Garrett & Co., on the Hancock farm, have got their last string of casing in. The Bear Creek Refining Company will put in their second casing on the McClay farm on Monday, being 1,386 feet deep this evening. Patterson's and the Forest Oil Company's Young well, No. 1, is doing six inches per hour. The Ringeisen well has its last casing in and is 1,600 feet deep. This is one-half mile in advance of developments and is being watched with a great deal of interest as it tests a large amount of ments and is being watched with a great deal of interest as it tests a large amount of territory as yet untouched by the drill. The Forest Oil Company and Queen No. 1, on the Hollshouse farm, is spudding, and No. 2 istociay rigging up and will start spudding by the

beginning of the week.

A SMALL PRODUCER. Mellon & Garly's No. 1, on the Blyle farm, has done the "Mexican mustang act," and to use the vernacular term, to all appearances she has "bucked," and is showing for a small prohas "bucked," and is showing for a small producer for this field. The Kenawina Oil Company have their machinery on the ground for their Davis lot well, but will probably not drill it until after farther developments in this locality. Spang, Chalfant & Co. to-day made connections to the Whitney gasser, and this afterneon it was in the turnaces at Etna. This will be a boom for this firm, as they have been short of gas for quite a while, and this only partially fills their actual necessities. The Bowman gasser, which was purchased by the Bridgewater Natural Gas Company, looks as if she were gaining, or as the trade would say, "dirilling herseif in," it bring conceded by all who have seen her within the last few days that her volume has materially increased.

A Mystery Unveiled. CHARTIERS.—The Fisher Oil Company's well on the Stimmiller farm, coming in as it did, was a surprise to a majority of the operators in the field. The well has been shrouded in mystery, through which deception it has erroneously been reported dry, thereby enabling its owners to secure adjoining territory. Such reports are not only misleading to the trade, but often work an injury to the interests of others engaged in the profuction of oil. This morning, when The Disparch representative sought information from those in charge of the well, their months seemed scaled with secreey, but upon being further interrogated they did not fail to convey the impression that the venture approximated a duster. The facts are, at 20 feet or so in the sand the pay was struck and the well began flowing. The pipe line people were hustled out of bed Wednesday night, and under cover of darkness laid a line and made connection to the tank, while the same precaution has been maintained in running the oil. From the most trustworthy information the well is doing, or did do, 100 barrels a day. Wether further drilling will improve the production remains to be CHARTIERS.-The Fisher Oil Company's

ill improve the production remains to be At all events the new strike has awakened in-At all events the new strike has awakened in-terest in the portheast end of the field, and has been incentive in starting new work in the imme-diate locality. Several important transactions in territory here have been consummated, while there are others pending. The Garley Broa.' Duff well was about through drilling to-day.

and the indications are not flattering for a producer of any consequence. T. J. Vandergrift and Tom Loan also completed their well to-day on the Dickson property, just south of Duff station, and from present indications will make a 20-barrel pumper. Fred Lauinger & Co., Canghey No. 2 are fishing for casing and tools, and Zinkham & Bryant, on the Bryant farm, also have a fishing job at 175 feet.

Huffinagle, on the Huffinagle lot, is drilling at 1,650 feet, and Rev. Mr. McKee, on his half acre lot, has reached a depth of 1,000 feet. Al Young, on the Taggart lot, is pegging away at 200 feet, while N. W. Stevenson, on the Laninger, is down 1,500 feet. Mower & Co., on the Johnson, are drilling at 600 feet. The McKee's Rocks Oil Co. will get the sand some time Monday and Gailey Bros are building a rig on the Pohr farm. The Bear Creek Refining Company are starting two wells. Dr. Black's well, on the May farm, is only making some eight barrels a day. Saturday afternoon the well was shot with 80 quarts, the result of which the reporter did not learn. The Bridge-water Gas Company will reach the sand in a few days in their well on the Pittsburg, Chartiers and Youghiogheny Railrond right of way, and the McKee's Rocks Oil Company's No. 1, on the Yonkers, is down about 1,350 feet. Young & Co., on the McKee farm, are perging away at 1,450 feet, and Kennedy, on the Louinger, is drilling at about the same depth. Tremble & Co., on the Hurley estate, are down 1,450 feet, and making slow time on account of the bole being full of salt water. The Still & Cowell, on the Crawford, is down 1,350 feet, while Snyder & Co., on the Hartman, are drilling at 1,350 feet, and have No. 3 rig building. The Fisher Oil Company's No. 4 Dickson, is down 550 feet; No. 1, Painter, 800 feet; No. 2, Painter, 500 feet; No. 1, Painter, 800 feet; No. 2, Painter, 500 feet, and their No. 1, Spencer, is rigging up. Foreign.
Germany seems inclined to open her market

A Business-Like Movement.

BUTLER-The movement inaugurated by the oil producers of this county, with a view of building a pipe line to the Ohio river and the erection of a refinery at that terminus, is backed by nine-tenths of the oil men here. Not only did the producers attend the meetings called to discuss ways and means, but they voted at the latest meeting to contribute both time and money to forwarding the project. The most encouraging feature of the discussions which have been held on the subject is the practical unanimity of opinion as to the best means for the accomplishment of the project. It has been decided that the site for the proposed refinery shall be on the Ohio river; that the par value of each share shall be \$10, and that the maximum limit of stock to be held by any single shareholder shall be \$2,000. The refinery is to be organized and operated under the limited partnership act, but the pipe line shall have a different form of organization, as the act referred to does not confer the right to condemn property, and certain other powers and privileges as are needed in the construction of such a line are wanting. Committees are engaged preparing the plans and details of organization, and they are assisted in the work by the best legal advisers to be had. The committee appointed to ascertain the probable cost of a three or four-inch pipe line, and a refinery with a capacity of 500 barrels per day, will visit Pittsburg. Cleveland and other cities where oil is refined, get the best possible data, and report berg at the meeting to be held next Thursday evening. They will start out on their mission Monday.

Operations in the 100-foot field are not so lively as they have been for several months past. Brandon Brothers' well, on the Brandon farm, which was opened up on Thursday, and did 600 or 700 barrels the first 24 hours, has stopped flowing, and will be rigged up for pumping. The pipe line company refused to take the oil on the first day, and several hundred barrels were lost. Haslett & Co. No. 7, on the Humphrey farm, is \$00 feet in the sand, and will probably get the first pay streak to-morrow. Bellis & Co.'s No. 1, on the Thomas Graham farm, is showing for a fair well. It has not yet been drilled through the sand on the Brunnemer farm, which gives promise of good results. Steel ings called to discuss ways and means, but they voted at the latest meeting to contribute both

An Electrical Well-Driller.

Saturday Wesley Webber was granted a patent for a new device for drilling oil wells by electricity. The new invention is a novelty, and if a success will revolutionize the modus operandi of drilling oil wells. The device is in-

the usual way. The entire mechanism, with a number of improvements to adapt it to drill-ing, is about the same as propel the electric street car, and as a number of mechanics and electricians who have seen it say, "there is no reason why the thing won't work."

The Situation at Montour.

MONTOUR—There is nothing of special importance to report from the Montour field. The Fort Pitt Gas Company's Thompson No. 3 is showing for a 30-barrel well. Sill, O'Dell & is showing for a 30-barrel well. Sill, O'Dell & Co.shot their No. 1, Young, which had a good effect; they will get the sand about the middle of the week in their No. 2 Phillip. The Homewood Oil Company shot their No. 4 Schuller, and increased its production to 50 barrels a day. During the month of September there were four wells completed, one of which is a gaser, the other three having a production of 85 barrels. From the August report this is a decrease in production of 172 barrels and a decrease in production of 172 barrels and a decrease in completed wells of three. A careful canvass of the field shows there are seven wells drilling and three rigs up, which is an increase of one drilling well and a decrease of three rigs as compared with the work shown on the 1st of September. Following is a tabulated report of the field:

port of the field;

A THE PARTY OF THE

The Mellon and Other Wells.

CORAOPOLIS-The Mellon well, on the Casiday farm, three-quarters of a mile northeas from the Finegan well, on the Cooper, and about one mile southwest from Coraopolis, was drilled yesterday and the production materially increased. Just what the venture is good for can't be estimated at this writing, but it is evidently a good well. Mr. Mellon must consider this good territory, which conclusion is based upon the good showing of his new strike, as he purchased a tract of land from the Kanawha Oil Company adjoining his lease for \$15,000, according to report. Mellon & Co., on the Carr farm, are down 630 feet; McCabe & Co., on the McCabe, are drilling at 430 feet; Haynor & Co., on the Arras, 1,000 feet; Coast & Evans, on the Neely, 400 feet; Augusta Oil Company, on the Sleanka, 800 feet; J. M. Guffey, on the Kerr, 1,130 feet. Guffey & Galley have No. 2 rig up on the Robert Ferree farm, and another one on the McKeown farm.

The device is intended to supplant the use of heavy tools and do in a scientific way that which has heretofore been accomplished in a crude way. The device, as distinguished from the power in the device used at present, is an apparatus comprising a series of motors in tandem, connected to one another so as to practically make one motor. The reason for using the motor in tandem is to get the power within a six-inch diameter, so that the entire mechanism, which is the true place of resistance in "making a hole."

Projecting therefrom is a rod which resembles a piston-rod working in and out of the cylinder; upon said rod the drill bits are firmly fastened and the apparatus lowered in the well and the Enterprise Oil Company and Francis S. Watson...T. J. Sefton received one year in the Penitentiary for fraudulent land dealings agent for the National Capital Savings the Penitentiary for fraudulent land dealings as agent for the National Capital Savings Building and Loan Association..., One man was killed and five injured by the falling of a wall at Callery's row, Allegheny.

Not With the Brotherhood.

F. K. Adams, Chairman, and C. C. Brainard, Secretary of the Committee of Arrangements for the Twenty-seventh Grand International Convention of Brother nood of Locomotive Engineers, deny that the men, Way and Mayer, who were ar-rested on the Southside on Thursday, had any connection with their organization.

Catarrhal Dangers.

To be freed from the dangers of suffocation while lying down; to breathe freely, sleep soundly and undisturbed: to rise refreshed ache; to know that no poisonous, putrid matter defiles the breath and rots away the delicate machinery of smell, taste and hearing; to feel that the system does not, through its veins and arteries, suck up the poison that is sure to undermine and destroy, is indeed a blessing be-yond all other human enjoyments. To purchase immunity from such a fate should be the object of all afflicted. But those who have tried many remedies and physicians despair of

Neglect it and your good name will suffer. Do not think that house-cleaning is too troublesome; it is worth all it costs, especially if you reduce the outlay of NEW ADVERTISEMENTS.

WALL: PAPER! New Styles, Choice Colors,

Low Prices.

Fine, medium and low price Carpets in all the new ideas in color and styles, at prices that will

please you.

WALL PAPER — All the new found it and still find it to their advantage to go to this house. Why not you? Try it, large line of all kinds of wall paper, and our prices are away down. Don't buy a Carpet, a bolt of Paper, Lace Curtains, Portieres, Linoleum or anything in our line until you see our stock. It will be money to you.

Geo. W. Snaman,

136 FEDERAL STREET, ALLEGHENY.

You Profit by It.

You like the Wanamaker way. We believe in straightforward business, and giving our whole attention to clothing, and selling it for the least. We are selling the hand-

somest Boys' Clothing we ever made-on its worth. Just selling the Clothing. putting its prices on the fair and square and solid ground of its being all-wool, of better and exclusive styles, when compared on these points, and being worth more all around for the boy.

Our stock of Men's and Young Men's Fall Suits is a mirror of the best designs the manufacturers have produced. We have put such style into them as enhances their beauty.

The luxury of a silk-lined ready-made Fall Oversack for those who want luxury. Yet, you'll not lose an iota of style if you buy one of ours at a lower price. We have not re-stricted style to the silk-lined.

FOR BUSINESS WEAR

The Sack still retains its popularity. Beside the regulation Single-breasted style, the Double-breasted (straight-like illustration-or Cutaway) will be much worn this season. They come in Plain Black, Blue, Mixed, Plaid and Striped Cheviots and Cassimeres, and are worn full suit alike, or with separate pants. We show these very nobby Suits, in strictly all-wool materials, made and trimmed in a custom-like manner, at

ONLY \$10

And guarantee them equal in every respect to similar Suits offered by competing houses at \$14.

Of course, we have the fine grades, too, and they range from \$12 to \$20. Over 300 new Fall Styles to select from. Every taste and purse can here be suited.

FOR FINE DRESS

We have a magnificent and extensive assortment of Men's Single and Doublebreasted Cutaway Frock Suits, in one, three and four-button styles. They are made of Clay Diagonals, Cassimeres, Worsteds, Corkscrews, Cheviots, etc., in a seemingly inexhaustible supply of stylish patterns, colors and shades. Prices range from \$10 to \$25. Special

OVERCOATS WINTER.

attention to our special line of first-class Dress Suits at \$15.

Over five hundred different and distinct styles to select from-and every one a beauty and a bargain. English Box Top Coats from \$10 up.
